Maybe you should think about investing in an air hockey table. The best air hockey tables provide hours of entertainment and will definitely be a hit with children and adults of all ages. You may remember spending precious dime playing air hockey in your local arcade. Well, now you can bring one home to yourself and play on it whenever you want. Air hockey tables are quite advanced pieces of equipment and quite large. Often eight feet in size, these tables work through the air pushing through countless jets causing the puck to hover over the service. The game of air hockey can be frantic, energetic, temperamental and last for several hours. I'm sure it'll save the kids from going down to the play room after school. So now you know some of the reasons why you should invest in the table of air hockey. But which one should you buy? There are quite a few options on the market. Some of them are cheaply made and designed, while others certainly provide the value of the purchase price. To help you make the right decision, here are some of the best options available this year with a selection of the most popular brands and products! This, as you would expect from us, is an EPIC post, so grab a coffee before you start and see how we cut through each product and review it with accuracy. If you are on time and need to know the results of our reviews, check out the results table below! As we have already mentioned, there is such a wide range of air hockey tables to choose from. In this guide you will find nothing less than the best along with a key list of features and pros and cons for each product. Valley-Dynamo Fire Storm Air Hockey Table If you want a real arcade feel, then this is definitely an air hockey table for you. Even the design screams that it belongs in a buzzing room full of laughter and cheers thanks to the fire of red paint. The table has a top line Dyna-Blast pulley system that ensures that the puck slips like never before. It is completely adjustable and this amazing table is full size. At 93 by 45 inches, you're getting a real air hockey experience with this option, and that's not all. The table was also built with a stunning graphic display. There is a beautiful backlight overhead, and interactive flashing light and sounds that blast out the 200-watt speaker system. As you would expect with such an immaculate design, this table is designed with full overhead System. The table is also equipped with a number of fantastic accessories, including 2 drumsticks, a green puck that shines and a white puck to start the game. ProGraphics and Sounds will make you feel the action of the game more than ever before. Lots of accessories are part of a full LED scoring system that provides incredible displays. A full 1-year warranty will give you peace of mind, while free shipping provides great value for money. Once the table is in place, it is easy to assemble and can be ready in minutes. Jam proof scoring system ensures that you never lose track of who wins. UV coating ensures that the table stays in fantastic condition for an extended period of time. Service table lit provides fantastic visual.Commercial level build work. ConsEasily one of the most expensive tables on the market, it will not suit every budget. The product is heavy, which means you'll probably need a moving team to get it in place. The table is largely designed for commercial use rather than home games. Technical problems may occur during the first year of use with scoring sensors. Pucks can get hacked and need dislocation. Check the price of Valley-Dynamo FireStorm on the AmazonValley-Dynamo 8ft Pro Style Air Hockey table with overhead scoringNew option from Valley-Dynamo, this table provides the same high quality build but is much less flashy. Instead of a fire of red design, you get a table that is elegant black with a dark blue color on the surface. The table still provides a great overhead scoring system that tracks who is at the top at any given time. It is a full-size table, making it ideal for both commercial and home use with a very impressive design. It has the same dyna-blast sink as the first option on our list. The system is designed to ensure that the puck does not get stuck and that the game is constantly conglomerate without breaks. The legs for the table are polystyrene and are designed to ensure that the table has a solid base for the best possible game. This table is also fully approved by the United States Air-Table-Hockey Association, so you can guarantee that you are getting a fantastic product. Dynamo is known for its quality hockey tables and this is definitely no exception. Indeed, with this product you could play hundreds of fast and wild games without seeing a scratch. You can lean on the rails too much during the game and you won't have to worry that they might break under pressure. Prosl provides a fantastic level of durability and quality assembly from a large manufacturer. The table is perfectly designed for intense, fast fire and energetic play. Polystyrene legs come with foot levelers that adapt to what they stand for. The directorial scoring unit is included and will monitor your games for professional games. The true size provides the full experience of professional air hockey. ConsBuilt for commercial use, this table can be too expensive for casual players. No flashing lights, sounds or features you would expect from a typical arcade hockey system. Plain design can be too boring for some players and buyers. It is especially suitable for people who want to be professionals rather than children or casual. This table is difficult to assemble and hard. You'll need at least three people on hand to get it set up. Check the price of Valley-Dynamo Pro Style on AmazonBrunswick 7ft Air Hockey Table - WindchillThis is the first table on our list that is built and designed for the general consumer market. Instead of belonging to a bar or even a commercial air hockey arena, it's suitable for your basement or games room. You will know this immediately, because it comes with a typical residential size mallet, rather than a commercial one. This is to be expected, though, because this table is a good foot smaller than commercial size. Similar to the Valley-Dynamo product, this table comes with a pedestal to maintain the entire level of the system. Although not as impressive as the other offerings, the table provides two dual shooter systems. It also offers a modern style for today's homes instead of vintage models that you could already see on the market. The steady flow of the UL sink is also part of the design and is working to ensure that the game continues to move at a fast pace. The prostyle is easy to assemble and can be mounted in less than thirty minutes. Ideal for children and adults to play thanks to the fast speed of the game. Much more affordable than standard commercial products without losing design quality. Durable and hard, this table can or against fast gameplay and only the heaviest hits will damage the surface. A strong fan ensures that there are no dead zones on the table. Size and weight means it requires at least two adults to put it together and assembleScratch resistance ensures that the table will still look great after you've used it countless times. The company will provide a replacement table if the original product is damaged. ConsYou may find the sound of the fan to be quite loud and irritating, but that's only on when the table is up and running. There are no bells, buzzers or any other noise you could expect from a top table. A smaller table that is not suitable for a more serious game. Only a 90-day warranty rather than typical annual coverage. Not suitable for outdoor use as the table absorbs moisture. There are no spare parts to cover the damage. Check the Brunswick price on amazonpremium black 7-ft Air Hockey Chrome Table w/5 year warranty from FamilyPoolFun.comYes looking for an arcade-style hockey table that might be suitable for your home? If so, FamilyPoolFun.com you would be covered with this fantastic product. Although it is intended for home use, this product has a commercial design, which means that there are more than 3500 air vents to ensure nonstop play. It is also made of MDF materials and finished in black PVC. The table is designed to be scratch-resistant and comes with four hockey pucks and a good four black assailants. Offering four foot levelers, this table is designed to never give one side an unfair advantage. The table weighs a huge 380 pounds, so despite being suitable for home use is quite difficult. You will also love the stylish modern design. It's not vibrant and colorful, but it's also not plain and boring. The table is suitable for both children and adults, it comes with a complete scoreboard that automatically changes to constantly monitor who wins. We are also thrilled to say that there are four different settings to explore. The full five-year warranty ensures that if the product is damaged, you can easily get replacement. PVC covering provides an anti-scratch resistant service that will make your desk look great for years. The commercial air system is designed to ensure that there are absolutely no dead spots with the powerful air cooler motor. The product is made of high quality and designed to withstand heavy bumps and knocks. The table legs are automatically adjusted to provide the strongest base no matter what service you use. It comes practically fully assembled and all you have to do is attach the legs. The scoreboard is easy and provides great entertainment. Cons Seven feet it is not a commercial size and will not be suitable for those who want to train on a professional level. The heavyweight ensures that setting up and relocating can be tricky without help. It can be difficult to identify the different settings that are available. Check the price of premium black on amazonlancaster AWH066_018P 66 inch air powered air hockey table w/electronic scoringYour looking for a high quality table at a reasonable price, this will be a great choice. It's by far the cheapest on our list, but don't be put off by the cost. This table still turns out to be a fantastic extra entertainment for family games. It's considerably smaller than other options and falls under five feet. So it might be perfect if you want an airy hockey table, but you don't have a massive level of space full-size product. The table has reinforced legs designed to provide the best possible level of play. This means that bumps and bumps won't affect score or fairness when you're having fun playing. In addition to high-quality legs, the shiny surface is also thickened, which means that you will not have to worry about problems with gameplay. The table comes with a number of great accessories including two pucks and two pushers. Lancaster claims that this table is suitable for families, cellars, arcades and even professional play. Although we are not sure this is true, despite the size of this table it would not look out of place on the arcade at all. After all, it has a fantastic live design. Like that, the table provides the sounds and buzzers you would expect from a product suitable for this type of arena. It's definitely not a barebones facility and you get a lot more than you might expect for the price. It's well assembled and is perfect for a family with kids who want to get into this fun game. ProsCompact in size, this table will serve you will even if you do not have a lot of space. Great value at a low and cheerful price without losing the quality of higher end products. Sturdy legs ensure you don't have to worry about an unfair advantage on both sides. Designed for fast play and fast motion with a powerful and reliable fan system. It comes with all the pieces you need to stay playing immediately. ConsDoes require settings and it will take about an hour to prepare it. Two pucks provide a different gaming experience. While one will swim beautifully the other is quite useless. You need to try them out to find out which one suits your needs. Not suitable for people looking for a real experience with a full-fledged system. It provides sounds but doesn't have a quality speaker system you might hope for. This is not a scratch-resistant table, so after a year you start to see signs of wear and tear. Check Lancaster's AWH066_018P price on AmazonWeight and SizeThis is the first factor you should always keep in mind. The seven-foot table is generally considered ideal for home and family use. Anything less than that is really just for kids or teenagers, and if you want a full experience for eight-footer professionals there is always a way to go. You just have to worry about the weight if you're going to be moving around a lot on the table, or if you're wondering if you need movers to get it in place. BuildYou quality should always check the build quality of the table before purchasing. The high-quality table will be durable and strong. This provides two advantages. If the table is durable, you won't have to worry about the bars smashing or scratching on the surface of the table. That is why you should really choose a table that provides anti-scratch surface. There are quite a few like this available on the market and you will be grateful that you have invested in one after several years of serious play. The strength of the table ensures that it remains robust after serious, high-octane operation. Remember, it's pretty common to lean on an air hockey table during a game, so you should be able to support it. Fan PowerThey want a table with a large, quality fan. The fan is essential to keep the game moving and as fast as you would expect. Always check reviews for all mentions of dead places. Dead places, as the name suggests, stop the game dead. The puck stops moving somewhere in the middle of the table, which means you have to start over from the last point. It is an unpleasant problem that can be avoided by investing in a quality product. Another problem to be aware of is the fan pushing the air the wrong way. This is a common technical problem on cheaper devices, but can be easily fixed. Puck size and pushersLarge puck size and pusher is another small detail that tells you if you are buying a table for ordinary consumers something more suitable for professionals. The puck for the professional game should be three inches. You will find that tables suitable for children provide pucks, which are instead two. Instructions and maintenanceYes you definitely want an air hockey table with fantastic instructions on how to set it up and control the device. Without it, you will fight especially if the table arrives in pieces. They can be notoriously difficult to put together without proper instructions for use. Similarly, you need to consider the time it will take to prepare and prepare the table. It is not uncommon for setting times to be more than an hour. Alternatively, some arrive almost fully assembled except for the legs. Parts and accessories includedIs a variety of accessories that can come part of these air hockey tables. This includes: Separate scoreboardO protective coverPucksPushers Separate scoreboards usually fit across the table for arcade aesthetics. These look great and you can probably expect lights and sounds as well. Some tables are also equipped with a complete protective cover. It is designed to make sure that the table is not used as a real table at any point! This stops people resting things on the surface when it's not in use and is usually part of commercial products. Pucks and pushers come in different shapes, sizes, styles and colors. Usually you can get at least two or four with each table. Some will shine and may even light up depending on the individual design of the product. These are some of the best options on the market, but which one is right for you? Well, if you're interested in making sure you get the full experience, our pick would be the Valley-Dynamo Firestorm table. It has a look and function that you are sure to love. The only problem is the price. Since it is built for commercial buyers, you will try to fit this one in your typical budget. However, this does not mean that children or grandchildren will not like it if you do. I'm sure they will and despite the high price you get your money. This gives you the best sound system and entertainment option on the market. If, on the other hand, you don't have the money for the whole deal, a seven-foot table like the Brunswick product will be the best option. It doesn't have all the bells and whistles but it gives you the full quality of the game you would expect. That is, no dead spots and a solid level of durability. This will take as long as the more expensive options on the market. In addition, it will look great too and finish all the games room in your home. Home.
